

How long does your coating last..?

PPA 571

From the Tropics to the Arctic

The *Art* of Protection

Plascoat PPA 571 is a thermoplastic coating powder that can be applied by either fluidised-bed dipping or by electrostatic spraying.

- Environmentally Friendly - **no** VOC's, **no** TGIC, **no** phthalates, **no** isocyanates, **no** halogens and **no** heavy metals
- Approved for contact with food and drinking water
- Will not chip or crack in service
- Graffiti can be wiped clean*
- Attractive gloss finish in a range of colours
- Superior resistance to salt, sea, sand and sun

Plascoat PPA 571 has been extensively tested in a number of laboratories and has been used and monitored for many years in applications from the Tropics to the Arctic.

Plascoat PPA 571 outlasts most, if not all traditional coating powders in terms of UV, salt-spray and pollution resistance, flexibility, resistance to sand abrasion and cold temperature impact properties.
